Beschreibung

Web Email Script Enterprise is your perfect webmail script solution that features a unique AJAX interface that mimics the widely popular Gmail webmail service and our software also offers your users with disposable email addresses with pre-defined time limit which users can receive emails sent to the temporary email address before it expires. Web Email Script Enterprise is also integrated with Google AdSense module with domain targeting technology to fully maximize your ad revenues. Other features include: auto-check emails, easy design integration, 3rd party php integration supported, admin backend interface, multiple attachments support, WYSIWYG editor, web-based setup and more. Run your own disposable email service and gmail clone webmail service with Web Email Script Enterprise.
