Description

The website owner sooner or later will realize that a live chat room is one of the crucial elements required for boosting the popularity of the site.

123FlashChat can add a chat room to websites like dating sites or social networking services, with users fully integrated, text chat and video chat. It can be easily integrated to the leading CMSes or forums: Joomla!, phpBB, vBulletin, Skadate, etc. It has literally every feature you will need in a chat, upload/webcam avatar, video special effects, avatars, smilies, flash emotions, voice messages, multiple rooms, dynamic skin change, separate video windows, a facebook-like chat bar... even a media player.

123FlashChat is based on Java server and Flash client.

Both end-user and administrator will find no problems with adjusting 123FlashChat thanks to its ease of use. 123FlashChat works well cross-platform, such as Windows, Linux, and Mac OS. Lately it can run on iPhone and iPad too!

123FlashChat has gained clients' confidence worldwide for superior performance, ease of use and impressive amount of features. It's no wonder that now 123FlashChat is in high demand and used by more than 400,000 websites in over 150 countries.
