### Produktbild

### Description

phpWebAlbum generates your photo album on the web. After installation it's as simple as dropping your JPEG photos into a folder on your webspace and everything else is generated by phpWebAlbum automatically! The main features are:

- [\*]Automatic thumbnail generation for images and folder content
- [\*]Built-in user management to restrict access to certain folders
- [\*]Localization via language files (english and german shipped)
- [\*]Edit and display photo description
- [\*]Show photo view count
