Beschreibung

:: What is 'VoteBox_2':

The core of the script is new, the logic is new! All buggs are gone! This version is your thing!

:: Features:

As many Votes as you like

As many many Options as you like!

Display a Time-Line when the Vote goes offline!

Decide for all Votes with a single click if it's aktiv or not !

Create/manage/edit/Delete Votes with a handy Intuitiv GUI

The output generates automatically the correct number of Radio-Inputs

Detailed Statistics (Hits/Percentages)

You can use it in german and english! (both incl.)

:: Requirements:

PHP 4 and higher

MySql-Database

HTaccess recommended

:: Specials:

Full automatic Installation-Script

VoteBox is MultiLingual!

VoteBox 2 can interact with "MyEasyMultiLingual" from Simpeligent

Unlimited Languages are possible!

If your Website is dynamic and controlled with GET-Strings, you will love this Script!

Just add the needed Query-String into the Setup-File and VoteBox 2 will work within your website!

Mager development-target was: It has to be easy to put it on yourwebsite.

Try it - I made it that way!
