Beschreibung

Start your own popular social video bookmark website with ease. This full featured php Video Bookmark Script is very easy to install and use. Video Bookmark sites are very popular, they receive high traffic and at this time they are very rare. Social online video sharing is the future of the internet market. So now should be the time for you to run your own website in this new high revenue niche. This social video bookmarking script is not only a simple bookmark script like others, it does also support video bookmarking and video embedding for your users on your site. Through the video comment feature and user profile page including user avatar it is also a great community site. The Video Bookmark Script would be a good choice to start a niche site which collects all links and videos for this special niche. You will get a high revenue with this script, through affiliate marketing, Google Adsense advertising and direct ad space selling.
