Beschreibung

Class for comfortable read and write ini-files.

This class provides functionality for reading ini-file from harddisk, editing it's elements (easy, with tree-like objects) and writing it on the harddisk (without loosing any comments!).

It although let's you create a whole new ini-file-object in wellknown structures and let you be shure, that the ini-file is of correct syntax!

Just have a try, good example-script for testing included.

This Script is GPL licensed!
