Beschreibung

This is an Open Source project to provide an example study for those who are considering running an online shop. This project is not to be taken "out of the box" to run as your shop, but is made available to help you make your ideal online shop.. yourself. Some of its currently supported features include: New customer account creation, Customer log on / log off, Customer account modification, Customer address book, Customer purchase history, Server-Side customer cart, Catalog browse/search, Read/Write product reviews, Email notifications, Checkout with progress bar, Secure transactions with SSL, and more.
