Beschreibung

Menu system is an Open Source menu/submenu web navigation system, IE4+/NS4+ compatible. As from the 2.0 version, Menus has been upgraded to fully support DOM compatible browsers as Mozilla, Netscape 6.x and Konqueror. By adding DOM support in Menus, InterAKT releases probably the best DHTML menu system available on the market. Using Menus is very simple and intuitive, new menu items adding resuming to a single line of code. The approach when coding menus is an Object Oriented approach, and the menu items are DHTML DIV's, any DHTML elements being usable inside. This way, adding image icons to the menu items is a child's play. Menu features: --DHTML menu items; --DOM support; --Minimal page reload. Price: GPL. Platform(s): Windows, Linux, Unix. Version: 2.0 File size: 35 KB
