Beschreibung

mnoGoSearch is a full-featured free search engine software for intranet and internet servers. mnoGoSearch has number of unique features, which makes it appropriate for a wide range of application from search within your site to specialized search system such as cooking recipes or newspaper search, ftp archive search, news articles search, etc. mnoGoSearch consists of two parts. The first is an indexing mechanism (indexer). The purpose of indexer is to walk through HTTP, FTP, NEWS servers or local files, recursively grabbing all the documents and storing meta-data about that documents in a SQL database in a smart and effective manner. After every document is referenced by its corresponding URL, meta-data which collected by indexer are used later in a search process. The search is performed via Web interface. C CGI, PHP and Perl search front ends are included.
