Description

CandyLog is a free weblog system.

Some CandyLog features:

- Administration area.
- Multiuser system with rights management
- WYSIWYG editor for creating and editing articles and comments
- RSS feed for articles and comments
- WYSIWYG design editor to manipulate colors, fonts and more in predefined templates. With CandyLog you can automatically switch between your saved layout designs once a day. So a new Website design can be displayed every day.

CandyLog needs a MySql database and PHP 4.3 or higher with gd2 enabled.
