Description

Create your own unique video website with ease. With this full featured php video embed script you are up and running within minutes. For example a niche website with only pet, funny, or music videos or an adult embed video site with only adult videos. The script comes with 4 site style colors (red, green, orange and blue). You can easily switch between the colors to get your favourite style. YouTube, ClipMoon and MetaCafe embedding modules are included, to easily add videos from these sites by adding only the video url to the script.

Further features:

- Cloud tags feature
- Search videos on every page
- Setup your site meta tags and static page (contact) without HTML knowledge
- Social bookmark, tell a friend and video sharing features.
- Ajax video rating feature.
