Description

NuSphere phpED is an Integrated Development Environment (IDE) for PHP, a server-side HTML-embedded scripting language. phpED provides provides a flexible, easy-to-use platform for developing web sites using PHP, Perl, Python, JavaScript, C++, CSS style sheets, and HTML. phpED also provides streamlined functionality for debugging code, publishing projects to remote servers through FTP and WebDAV, working with SOAP servers, and integrating with repository-based code management systems such as CVS. phpED is suitable for multiple developers and very large projects.
