Description

Classified Ads Script PHP is an easy way for the visitors to publish ads on your existing site.

Visitors also will be able read the classified ads, leave comments and send enquiries.

Classified Ads Script PHP features:

- One step install page
- Password protected admin area
- Full language support in the front-end of the script
- Fully customizable visual style through the admin area
- Can literally be dropped into your current site and usable in minutes, not hours or days
- Buttons for 'Print Page', 'MySpace', 'FaceBook', 'Twitter', 'Send to Friend' and 'More Options'
- Set number of classified ads per page
- Option for featured classified ads
- Option to approve classified ads before having them posted
- Set number of days to expire
- Set your currency
- Choose the default category to be loaded on the first page
- Option to send email enquiries to publishers
- Option to allow comments to each classified ad
- Option to ban unwanted words in comments
- HTML and Javascript injection prevention
- Captcha verification code - 100% stops spamming
- Option to approve comments before having them listed
- Email notification to administrator for the new comments
- RSS Feed with images, validated by w3c
- Fully readable and simple PHP code, so you can change it to suit your needs
