Description

uAutoDealers is one of the best one-size-fits-all solutions for any car dealer who are looking to bring their business online. This script is the fully functional PHP solution that allows to create infinite pages for listings, easily modify data fields, and customize your services to suit your needs. This PHP based classifieds system and inventory software is endlessly customizable and easy to maintain. Powerful administrator panel and online reservation manager at the back-end includes all processes and reports functionality.

Visitors of Auto Dealers will be able to search vehicle listings online, place their price bids/offers, contact vehicle owner and do many other operations. They also could view vehicle description, images, videos, check a list of damages etc. Listing owner has a complete control on listings in a real-time.
