Description

ApPHP Hotel Site is a powerful hotel management and on-line reservation site script. This script is the fully functional PHP solution to manage small to medium size of hotels, holiday flats or guesthouse.

Visitors of Hotel site will be able to search rooms availability with an online booking reservation system. They also could view rooms inventory, check availability, and book reservations in a real-time.

Administration Panel:

- Protected with password security and accessed from anywhere in web
- Manage admins and customers account details
- Manage hotel rooms and room types
- Manage rooms availability
- Manage languages
- Manage site settings and statistics
- Manage bookings and payments
- Add new pages, modify existing pages or delete existing
- etc.

Customers Account:

- Mange account info
- Manage current and previous bookings
- Search for available rooms
- etc.
