Description

CodeThatMenu is advanced cross-browser state-of-art JavaScript menu
control that can be easily integrated in any web page, requires no
JavaScript knowledge from the prospective user and comes with the
features everybody expects from the modern navigation menu:

- Cross-browser compatibility
- Easy to use and setup
- Both drop-down and popup menus are supported
- Unlimited menu depth with all levels independently configurable
- Look and feel and appearance of the menu controlled through the CSS
class
- Look and feel of the menu item when in "mouse over" state is supported by
the CSS class
- Link targets (other frame, new window, parent frame) and tool tips are
supported
- Customizable attractive transparency and transition effects (IE 5+)
- Whole menu item area is clickable (not text caption only as in most others
javascript menus)
- Run-time access from javascript
- Low weight and high performance
