Description

dhtmlxGrid is a flexible, feature rich JavaScript grid control with Ajax support and powerful API. It provides client-side solution for displaying, editing and sorting tabular data. The component supports different datasources, including **XML, JSON, CSV, JS array, and HTML table**.

Using dhtmlxGrid you can easily create dynamic tables with draggable columns, fixed multiline headers, multiple cell types, filtering, searching and grouping capabilities. **Smart rendering** and **paging output** allow this grid to work effectively with large datasets.

The grid control has simple and comfortable interface supplemented with ability of keyboard navigation that allows users to enter and modify tabular data intuitively.

dhtmlxGrid is available under both GPL (Standard edition) and commercial licenses.
