Description

Antiadbuster Pro is a server side application that protects your website from Ad Blockers, Popup Blockers, Cookie Blockers, Offline Leechers and Grabbers, Email Harvesters and JavaScript Blockers.

Written completely in PHP, Antiadbuster Pro not only protects your site from Ad blockers but also protects your site from dangerous offline grabbers and leechers which can download your entire site in seconds and jeopardize years of work.

Antiadbuster Pro is fully customizable allowing you to select which modules they want to enable on their site with a click of a button.

Antiadbuster Pro also provides detailed real time statistics and has a user friendly administration control panel from which every part of the software can be controlled.
