Description

DH-MLM v2.1 Features List:

- Manage affiliates up to 8 levels deep.
- Set payment amounts at each of these levels in either a flat rate amount or as a percentage of the item price.
- Make recurring payments to affiliates as long as they remain a subscriber to your service (either weekly, monthly, semi-annually and annually). Cancel at any time they leave.
- Retrieve refunds from affiliates who have already received a payment for referring a customer who in turn has requested a refund from you.
- Cooling off period to allow time before affiliates accounts are credited (ideal if you have a money back guarantee and do not want to make payments to the referring affiliate during this time).
- Cancel payments to affiliates while they are still in the cooling off period.
- Automatically generated yet fully customisable affiliate pages.
- Fully customisable header and footer.
- Ability to set cookie expiry days so affiliates will still get credit for the sale even if the customer decides to sign up at a later date. The later date must be within the set cookie expiry days.
- Sort list of affiliates by activity, sales, name or id.
- Administrative control panel to manage all affiliates and set preferences for DH-MLM.
- Affiliate control panel to track statistics and modify contact information.
- Affiliate ability to email their entire downline to help generate more sales
- Admin/webmaster ability to email all affiliates from a single form
- Admin/webmaster ability to customise automated emails to affiliates when they sign up, generate a sale, lost their password or referred another affiliate.
- 2checkout compatible
- Paypal IPN compatible
- Affiliate Ad Tracker for affiliates to track the success of their advertising efforts.
- Ability for the affiliate to choose which page/product to link to instead of linking to the main page
