Description

AlstraSoft Live Support is a PHP based customer live help software which allows you to run a profitable business offering remotely hosted live customer support service for your members. Functions include: initiate chat, referrer tracking, capture visitor data, push surveys, multiple chat sessions, canned responses, sound alert, online/offline status, leave a message if offline, email notifications, save transcripts, real time monitoring of visitors and many more. Live Support also features an automated payment membership system so that members can pay for your live support service using PayPal.com or 2Checkout.com payment gateway.
