Description

The CJ Tag Board is a quick and easy way of communicating with visitors to your website in real time. All you have to do is upload a few files, insert the code given into your webpage and you have yourself a tag board - the page with your tag board on it can have any extension (.html, .htm, .php, .shtml - you name it!)

V2.0 brings loads of features - smilies, url field, error checks, email admin, view all tags, larger message field and character countdown to name a few!
