Description

Joomla HD Video Share is a best solution for all kinds of video sharing websites to display high definition videos. This video player allows you to share videos on social networking sites with your friends. You can download or add videos from any third party video websites like Vimeo, YouTube etc. It provides 100% flexible and customizable options and also free ad-ons like Jomsocial, HVS komento system and K2 article item. Using this extension, you can create a video sharing website of your own style in just a few minutes. The trial version of this player is also available for a free download.
