Description

The IMS (Image Management System) is a great service to provide your clients if they need to store and manage images they use in their auctions. This flatfile, PHP software is packed with features like multiple uploads, filetype filtering, space allocation (with notification graphs), built-in security, multiple image folders, automatic signups, a comprehensive user manager and admin console, and lots more. This license can be used for an unlimited number of users on your server. Installation and configuration included.
