Description

phpWebAlbum generates your photo album on the web. After installation it's as simple as dropping your JPEG photos into a folder on your webspace and everything else is generated by phpWebAlbum automatically! The main features are:

- [*]Automatic thumbnail generation for images and folder content
- [*]Built-in user management to restrict access to certain folders
- [*]Localization via language files (english and german shipped)
- [*]Edit and display photo description
- [*]Show photo view count
