Description

Web based newsletter template for Dreamweaver MX - For the Dreamweaver programmers wanting to create a web based application to send HTML and text e-mail campaigns to registered users, MX Newsletter is the working solution. As the application template is built using Dreamweaver and the InterAKT MX Kollektion tools, you will be able to customize it to your needs in no time. Unlike other newsletter scripts that are not designed for reusability, our product is an application template created for Dreamweaver and MX Kollektion, that allows you to change most of the newsletter registration fields in a visual way, without manual code modifications. Features: --Easy to Customize with Dreamweaver and MX Kollektion; --Wizard for Fast Newsletter Creation; --Rock Solid E-Mail Sending Process; --Visual Editing With KHTML3; --Saving Time by Using Mail Templates; --Reports About the Newsletter impact; --Topic/Topic Groups; --Tight integration with Dreamweaver MX and the MX Kollektion; --LAMP/WIMP compatible. MX Newsletter currently supports: PHP_ADODB.
