Description

MonsterFile is a multi-user file hosting service. It helps you share files with others in a secure and simple way using your own PHP host. MonsterFile allows users to create folders and upload files.
You can create links that go to public previews of the files. Your friends and colleagues can download the file, to send to anyone by pasting the link into your emails, instant messages, web pages… Any method you like.

MonsterFile itself is 100% based on the PHP Zend Framework, which is one of the most successful and widely used PHP frameworks worldwide. It also uses JQuery and Twitter Bootstrap. Installation is very easy and fast.
