Description

Digital Postcards are a great way to attract new visitors and increase return visits to your Site. Our easy to configure Postcard Script is rich in features and comes with a 60 image library of photos to help you get your script up and running quickly. Updates to this script are free. This version creates an HTML page for each card created. This version of our Postcard script includes the same features as the script above, but creates the cards from a template that is populated by data drawn from a MySQL database. Updates to this script are free.
