Description

Syndikut Rate & Review (R&R) is a unique multiple rate and review PHP script using a flat file database. NO SQL required! Like FSR, R&R is very simple to use and, unlike most rating systems, extremely versatile. What makes Rate & Review v1 different from our 5 Star Rating script? Well FSR(5 Star Rating) only allows visitors to rate items, where R&R allows visitors to rate and post reviews. R&R also comes with rate & review statistics for your visitors to browse. Rate & Review can be used for any purposes such as items for sale, news clips or even stories and articles. Rate and Review is packed full of useful features that no other system can offer. Lets take a look at the features.

End User:

- * Simple rating system easy to use.
- * IP Logging to prevent cheating and to enable IP Banning.
- * Captcha code to prevent auto submitting (can be enabled or disabled)
- * Review Field allowing visitors to post review (can be enabled or disabled)
- * Active display of total ratings cast & the average rating.
- * Active display of total approved reviews for each rating
- * Multiple rate & review systems per page.
- * Multiple display options available for each rating. (see demo instructions)
- * Automatic RSS feeds of reviews visitors can subscribe to. (can be enabled or disabled)
- * Review previews displays a preview of reviews posted.

Admin:
