Description

This software enables visitors to instantly add your RSS feeds to their news reader of choice. Your website will get repeat traffic and hence eventually boost popularity and sales.
As you're aware, many people now use feed readers to manage the gathering, viewing and updating of their favourite RSS feeds. The most popular newsreaders can make use of a unique link and automatically add your RSS Feed to your visitor’s Newsreader. Just by clicking on this special link the person visiting your site or blog could ‘add you to favourites’ .Problem is a) you need to know how to set up these links and far more importantly, b) These special links are different for each newsreader which makes setting up a wide selection of newsreader links both tedious and time consuming. If you have multiple sites it could take hours and hours. The ‘Feed Reader Links’ is designed to help you to solve these problems.
